

Enable High-Performance Track and Trace

Accelerate Throughput with Zebra's Fixed Industrial Scanning Solutions

Boost visibility and traceability of your processes with Zebra's all-new Fixed Industrial Scanning solutions. Inspired by floor operations and differentiated by upgradable hardware and a unified software platform, our latest portfolio provides trusted decode performance that makes it easy to meet the evolving needs of your business.

Rising Demands and Challenges

Difficulty with track and trace and subpar accuracy

Errors and performance issues

Fragmented solutions and disjointed workflows

Rigid outdated solutions that lack upgradeability

Elevate Track and Trace Performance

Discover how Zebra solves workflow challenges

Accurately Verify Labels

- Read multiple types of codes (1D, 2D and DPM) and multiple codes simultaneously
- Confirm label data with smart cameras
- Monitor barcode quality to ensure standards are met

Quick and Easy Deployment

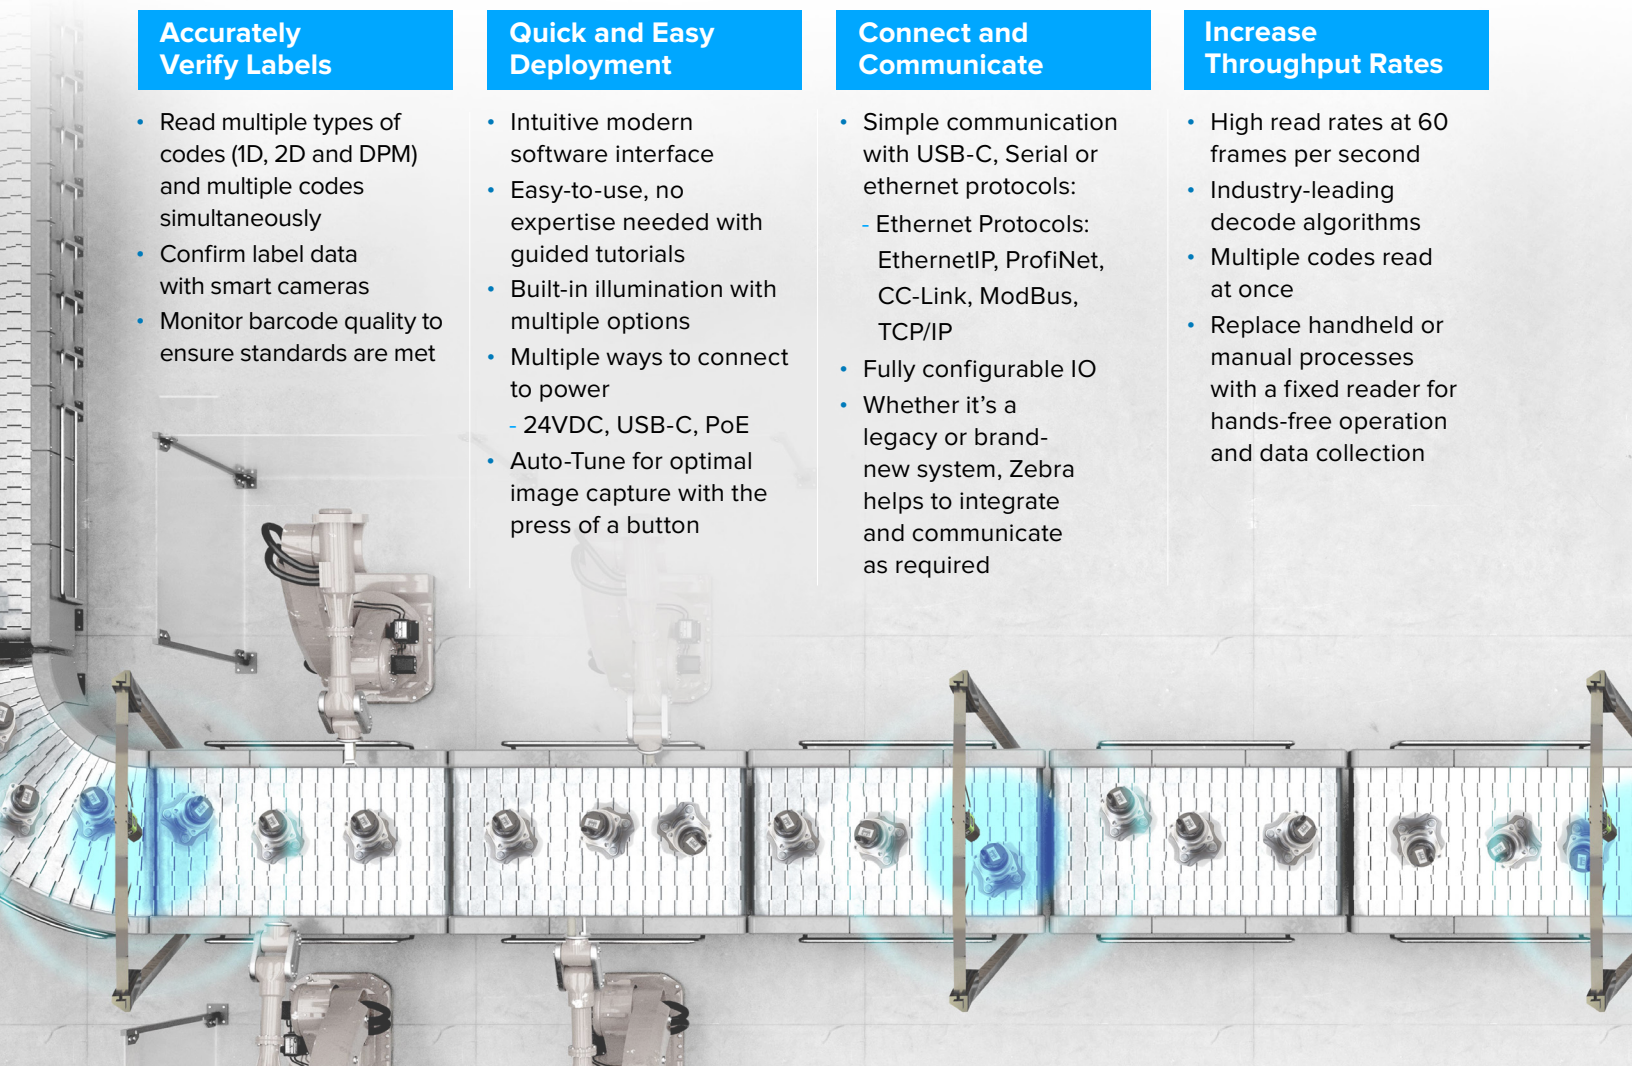

- Intuitive modern software interface
- Easy-to-use, no expertise needed with guided tutorials
- Built-in illumination with multiple options
- Multiple ways to connect to power
 - 24VDC, USB-C, PoE
- Auto-Tune for optimal image capture with the press of a button

Connect and Communicate

- Simple communication with USB-C, Serial or ethernet protocols:
 - Ethernet Protocols: EthernetIP, ProfiNet, CC-Link, ModBus, TCP/IP
- Fully configurable IO
- Whether it's a legacy or brand-new system, Zebra helps to integrate and communicate as required

Increase Throughput Rates

- High read rates at 60 frames per second
- Industry-leading decode algorithms
- Multiple codes read at once
- Replace handheld or manual processes with a fixed reader for hands-free operation and data collection

Meet the New Family

Zebra's Fixed Industrial Scanning Solutions

Experience lasting performance with features that can be added at any time with a simple software license—no need to buy new devices. Support new symbologies. Increase scanning speeds. Choose from a wide range of sensors—from 1-5 mega pixels. Every model is equipped with ImagePerfect, which captures multiple images of a single item (each with its own settings), as well as PRZM, to detect even the most challenging barcodes.

Comprehensive

Tailor the device to your specific needs by choosing from flexible options like decode range, illumination, connectivity, power and more.

Quick and Compact

Just plug it into the USB port of a workstation, laptop, tablet or any other host device to capture barcode data.

Easily Integrated

Multiple connectivity options facilitate easy integration into your PLC or Host network, enabling primary scanning applications to feed all the processes that drive your business.

Fully Customizable

Address complex imaging needs and make even the most challenging barcodes easy to capture. Customize by choosing from four image sensors and a wide range of C-mount lenses and lighting options.

Zebra Aurora™

A Single Unified Software Platform

Bring a new level of simplicity and user experience to controlling enterprise-wide manufacturing and logistics automation solutions with **Zebra Aurora**. This powerful interface makes it easy to set up, deploy and run all of Zebra's Fixed Industrial Scanners and Machine Vision Smart Cameras, while eliminating the need for different software per application.

Enable Performance. Inspire Potential.
